Module 3 Project

Section 1: (25 points)

In the **Module 2 Project**, you identified a former physical education program in your K-12 years of school. You answered logistical questions about that program. You also compared it to one of the physical education curriculum models in the textbook.

For the **Module 3 Project** (Section 1), I want you to continue to examine this same physical education program. Based on the information and examples of exemplary physical education programs in Chapter 8, I want you to determine if you think the program you were a part of would be considered **exemplary, average, or below average**. After making the determination, please **explain why** you selected exemplary, average, or below average.

Keep in mind that many physical education teachers do their very best to provide quality programs although they may not have the support and/or the tools (equipment, facilities, time, class size, athletics, opportunities, etc.) to meet the needs of their students. Many of these are barriers (Chapter 9) that the physical education teacher has no control over.

Your response should be written in paragraph form and have at least 100 words. (25 points)

Your submission should not exceed 30% similarity in Turnitin.com. Anything over 30% will result in a lowered grade.

Section 2: (25 points)

In the **Module 2 Project**, you identified an occupation in the area of management in sport, fitness, health, and physical education that you have a personal interest in. You also answered some basic questions concerning that specific occupation.

For the **Module 3 Project (Section 2)**, I want you to plan a **5-year career path** towards this occupation/profession. You can interview someone that already works in this occupation and/or you can research for the information.

You will need to include your remaining time at Erskine College (class choices, major, and degree that will help prepare you for the next step), graduate school search (if you will need/want an additional degree for this occupation/profession), certifications and/or licensures needed and how to obtain them, prospective job searches, making yourself available and marketable, etc. These are ideas and suggestions. Please include the steps you need to accomplish to pursue and secure a position in this specific occupation/profession.

Your response should be organized in months and years indicating when and where your next steps will occur.

Your submission should not exceed 30% similarity in Turnitin.com. Anything over 30% will result in a lowered grade.
